# Haymarket DuPage

Public Safety Impact Report

James Dominik, Managing Member  
POLARIS PUBLIC SAFETY SOLUTIONS LLC

## Haymarket DuPage Public Safety Impact Report

### Purpose

The purpose of the report is to assess the projected impact that Haymarket DuPage will have on the Itasca Fire Protection District's ("IFPD") Fire and Emergency Medical Services ("EMS") programs and the Village of Itasca Police Department and the community members currently served.

This report will address the following questions:

1. What are the current service and activity levels for Police, Fire and EMS in Itasca?
2. How do the Itasca Police Department and IFPD compare in activity levels to comparable police and fire departments?
3. What impact will Haymarket DuPage have on Itasca's public safety services call volume?
4. Do the Itasca Police Department and the IFPD have the capacity to deliver the required services to Haymarket DuPage without adding staff and/or equipment?

Information about Polaris Public Safety Solutions LLC and the credentials of the author are attached.<sup>1</sup>

---

<sup>1</sup>See Appendix A for Polaris Public Safety Solutions LLC information  
See Appendix B for James W. Dominik Qualifications Brief

## Overview of Haymarket<sup>2</sup>

### Haymarket Center Chicago:

Founded in 1975 by the late Monsignor Ignatius McDermott and Dr. James West, Haymarket Center Chicago is the largest not-for-profit community-based adult substance use disorder treatment facility in Chicago. Haymarket Center Chicago has grown into a comprehensive behavioral health treatment organization, licensed by the State of Illinois, which receives funding from the private sector, as well as city, county, state and federal agencies. The treatment programs are accredited by the Commission on Accreditation for Rehabilitative Facilities (“CARF”). Annually Haymarket Center Chicago serves more than 12,000 clients.

### Proposed Haymarket DuPage<sup>3</sup>

Haymarket DuPage plans to provide a full continuum of health care services to adults aged 18 and older at the Itasca location. Services will include diagnosis, treatment, and recovery support for persons disabled by substance use and behavioral health disorders who voluntarily seek care. Treatment provided is planned to include outpatient and inpatient treatment and recovery home programs much like the services provided at the comparable treatment facilities and recovery home sites (as discussed more fully in this report) and Haymarket Center Chicago.

Haymarket DuPage is expecting to serve approximately 4,750 patients a year through all of its treatment and recovery programs.<sup>4</sup> The maximum occupancy for Haymarket DuPage is 240 total beds:

- 144 Recovery Home Beds
- 96 Treatment Beds

---

<sup>2</sup><http://www.hcenter.org/>

<sup>3</sup><https://haymarketdupage.org/>

<sup>4</sup> This study will not discuss outpatient services because the historical experience at Haymarket Center Chicago indicates that outpatient clients have a negligible impact on calls for public safety services.

Haymarket's historical experience at Haymarket Center Chicago is 80%-85% occupancy at any one time.

### **Data and Methodology Used to Conduct Analysis**

#### **Sources of Data:**

Polaris studied eleven comparable treatment facilities and recovery home sites located in Illinois ("Comparable Sites") to predict the public safety service needs at Haymarket DuPage. The list of these sites is provided in Chart 7. Various data sources were used in this analysis to provide the most accurate projection of the impact that Haymarket DuPage will have on Itasca's public safety service providers. Polaris focused on Comparable Sites utilizing fire and EMS data available through two sources – the International Public Safety Data Institute ("IPSDI") and data received from FOIA requests. The police data was derived from FOIAs and the Wood Dale Police Department's annual reports (2014-2018), which include comparison data from communities surrounding Itasca for the past five years. After extensive study of City of Chicago data related to Haymarket Center Chicago and comparable treatment facilities and recovery homes located in the City, a decision was made to not utilize Chicago sites as comparison points due to concerns about the quality of data available (as more fully discussed in this report.)

The Comparable Sites were identified following an extensive review of the Illinois Department of Public Health listing of Substance Use Prevention and Recovery ("SUPR") Licensed Providers. The Comparable Sites provide similar licensed services to those proposed for Haymarket DuPage (Levels of ASAM Service – 3.2, 3.5, 3.7 and Recovery Homes).

The beds available for in-patient treatment and recovery home care at each of the sites were identified and used to develop a per bed activity analysis. A per bed approach is similar to what hospitals use to judge size of the facility. The per facility average for calls was also

calculated. Sites most comparable to Haymarket DuPage can be broken down into two categories:

- Recovery Home:
  - Haymarket DuPage will have 144 Recovery Beds
- Treatment Facility:
  - These were identified as providing the same level of services that will be provided at Haymarket DuPage. Haymarket DuPage will have 96 treatment beds (64 ASAM Level 3.5 beds, 16 ASAM Level 3.2 beds, and 16 ASAM Level 3.7 beds).

The goal of this study was to analyze data for the Comparable Sites (as available) and to make projections based on call activity for recovery home beds and treatment beds. This should provide the most accurate projection of the public safety impact of Haymarket DuPage on Itasca's public safety services. Only data for the full years of service was included and the averages were based on the number of years in operation.

### Fire/EMS Call Volume Data

IPSDI is a 501(c)(3) nonprofit organization formed by a collaboration of fire service, research, policy, and academic organizations. The IPSDI mission is to enhance public safety resource deployment and operations by using data analytics to provide actionable life-saving insights. The experienced team at the IPSDI includes fire service leaders, researchers, and data scientists.<sup>5</sup> The source of data used by IPSDI for this analysis is from the National Fire Incident Reporting System ("NFIRS") which is a reporting standard that fire departments across the nation use to report on the full range of their emergency response activities.<sup>6</sup>

---

<sup>5</sup> The International Public Safety Data Institute (IPSDI) provides fire and EMS agencies with analytical data. More information about IPSDI can be found at [www.i-psdi.org](http://www.i-psdi.org)

<sup>6</sup> See Appendix C for additional information on the NFIRS reporting system

Fire departments in Illinois are required to comply with NFIRS reporting pursuant to the Fire Investigation Act, 425 ILCS 25/6, which requires the Fire Chief of each department to submit reports of activity to the Office of the State Fire Marshal (“OSFM”). All the fire departments used in the study comply with Illinois law and provide data to the OSFM. Based on the research conducted as part of this study, Polaris decided to utilize data generated outside Chicago because these fire departments comply more fully with OSFM requirements than the Chicago Fire Department (“CFD”). CFD only reports fire incidents to the Office of the State Fire Marshall/NFIRS and not EMS calls.

Polaris intended to utilize NFIRS data provided by IPSDI to identify fire and EMS calls generated by Haymarket Center Chicago in an effort to analyze data which has been the subject of testimony at hearings relative to the pending Haymarket DuPage zoning applications. However, because CFD only utilizes NFIRS to report fire incidents, not EMS calls, NFIRS could not be used as a data source to identify both fire and EMS calls generated by Haymarket Center Chicago. In an attempt to obtain this data, under Polaris’s direction, FOIA requests were filed with the Chicago Office of Emergency Management and Communications (“OEMC,”) the dispatch center which receives 911 calls and dispatches the emergency equipment to the scene for calls for public safety services to Haymarket Center Chicago.

OEMC responded to the FOIA requests for police, fire, and EMS with raw Computer Aided Dispatch (“CAD”) data. There were numerous problems with the accuracy of the CAD data generated by OEMC. CAD data is entered by the call taker at OEMC. It is not uncommon for a caller to mischaracterize the incident, reporting either more or less severe conditions than what the patient is actually experiencing. OEMC dispatches resources based on the information provided by the caller, but the type of call cannot be accurately characterized until the emergency responders arrive on-scene and assess the situation. Although there are standard definitions for

“event type” characterization, two different call takers may characterize the same call differently based on their interpretation of the information provided by the caller. This can result in many inconsistencies when analyzing CAD data acquired from OEMC.

Moreover, as the prior Haymarket testimony revealed, CAD data reflects all calls received by the call center and does not eliminate duplicate calls for the same incident. Not knowing the circumstances surrounding each 911 call received, it is not immediately possible for the dispatcher to know whether multiple calls received for the same address at a similar time are for the same incident or multiple incidents occurring in near proximity to one another. While Polaris evaluated the CAD data received, it provided little value in making accurate projections for Haymarket DuPage based on emergency police, fire and EMS calls generated by Haymarket Center Chicago. The data was confusing, inaccurate and lacked consistency for not only Haymarket Center Chicago but also for the other comparable sites in Chicago. As a result, Polaris determined that Haymarket Center Chicago and comparable Chicago treatment and recovery home sites could not be used in the analysis due to faulty data sources.

In comparison, fire departments outside Chicago prepare emergency incident reports after completion of the emergency response, providing an accurate portrayal of the emergency incident as filed in the NFIRS system. Thus, Polaris decided to focus on the Comparable Sites listed in Chart 7. Polaris requested NFIRS data from IPSDI regarding fire and EMS call information for Itasca, its neighbors, and the communities which currently house the Comparable Sites for the four treatment facilities and two of the recovery homes. In order to increase the sample size of recovery home beds, additional Illinois sites were identified and FOIAs were filed to gather necessary data for fire and EMS calls. Together, NFIRS data and FOIA responses regarding the Comparable Sites were used as a basis for its projection of public safety service calls for Haymarket DuPage.

## **Police Call Volume Data**

The police response information used in this report was acquired from FOIA requests, along with information obtained from community websites and the City of Wood Dale annual reports.<sup>7</sup> The Wood Dale Police Department is a Commission on Accreditation for Law Enforcement Agencies ("CALEA") internationally accredited police agency. As part of the CALEA accreditation process, the Wood Dale Police Department completes an extensive annual report which includes comparison data with surrounding communities. Data included in the 2014-2018 annual reports was reviewed and utilized in this report.

## **Emergency Medical Services Call Classification - ALS/BLS**

This study used the total EMS calls for each Comparable Site as reported in the NFIRS system and the data received from FOIA requests. This data was then used to provide projections on the EMS call volume at the Haymarket DuPage.

Nationally there are two basic levels of EMS care:

- ◇ Advanced Life Support ("ALS") - generally critical care for life threatening issues
- ◇ Basic Life Support ("BLS") – generally non-life-threatening issues

In an article on calls that require EMS care published in the Journal of Emergency Medical Services ("JEMS"),<sup>8</sup> the national average of EMS calls that require ALS care is reported to be between 2-20%. An internet search revealed only one state that provides its ALS/BLS information on-line. The state of New York reported statewide EMS statistics that indicated that 13.25% of all EMS calls to be ALS in nature.<sup>9</sup> The NFIRS data for Illinois provided a higher estimate of 27% of EMS calls to be ALS in nature.<sup>10</sup> The study of Comparable Sites provided an ALS response of 25% for treatment beds and 40% for recovery home beds. Recovery home beds

---

<sup>7</sup> See Appendix D for Wood Dale Annual Report Information (2014-2018)

<sup>8</sup> See Appendix E for JEMS April 16, 2019

<sup>9</sup> See Appendix F for New York State Emergency Medical Statistical Information

<sup>10</sup> See Appendix O for data source information

generate significantly fewer calls overall than treatment beds. This is evidenced by the fact that there were only twelve EMS calls to the seven comparable recovery homes studied over a multiple year period. Two of the seven recovery homes had no EMS calls over the years studied. This leads to the conclusion that Haymarket DuPage will, similarly, generate only a negligible call volume related to recovery home beds.

**Calculation Method:**

Two calculation methods were used to determine the projected number of police, fire and EMS calls generated by Haymarket DuPage. The first calculation method is based on the ratio of total call volume for each public safety discipline (police, fire, EMS) at all facilities included in the study to the total number of facility beds operational for each year. This method is sensitive to bed counts and facility years in operation during the study period. The second calculation method is an average of each facility's data, counting each facility as one unit regardless of the bed count and years of operation. The data analyzed was used to develop a call per bed average for recovery home beds and a separate call per bed average for treatment beds. This was then used to project the impact of the planned 144 recovery beds and 96 treatment beds at Haymarket DuPage. Projecting impact using the combination of these two methods provides the anticipated range of annual call volume per public safety discipline and eliminates bias that could be created by selecting one method over the other.

## Comparison Analysis of Capacity of IFPD

### Fire/EMS Capacity Analysis

A Fire/EMS capacity analysis was conducted on all of the fire departments in Mutual Aid Box Alarm System (“MABAS”), Division 12. MABAS is an organizational structure used by fire departments throughout Illinois to assist one another by providing mutual aid. These fire departments are placed in geographic groups. The IFPD is part of MABAS Division 12. Some of the fire departments in MABAS Division 12 use volunteer or part-time staffing which affects the staffing number and creates difficulty in determining full-time equivalent employees. As a result, for this study only full-time career fire departments (“career departments”), such as IFPD, were analyzed for comparison purposes.

IFPD protects 6.5 square miles encompassing the Village of Itasca and portions of the Village of Addison and the City of Wood Dale. The IFPD is staffed by:

- One Fire Chief
- One Deputy Fire Chief
- 3 Fire Lieutenants (Shift Staff)
- 21 Full-Time Firefighter/Paramedics (Shift Staff)
- One Administrative Assistant
- One Part Time Secretary
- One Fire Prevention Officer

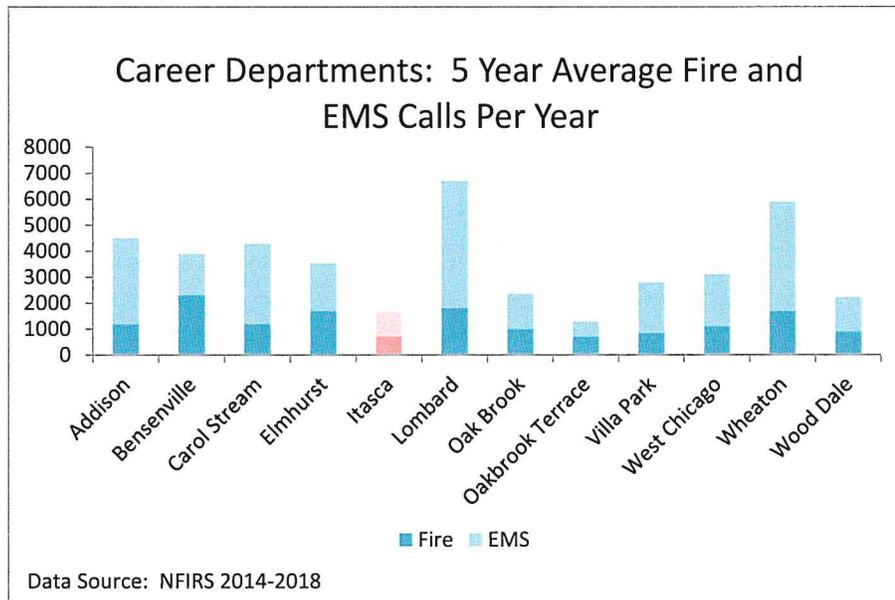

Daily, the IFPD staffs:

- One Fire Engine
- One Ambulance with ALS treatment capabilities
- One Aerial Truck

This totals 28 full-time personnel and one part-time secretary. For capacity analysis comparison, Polaris used 24 shift personnel (demarcated above) for IFPD to prepare Chart 3. This is based on the number of operations personnel assigned to shift work whose primary responsibility is emergency response. The shift work format was used to analyze all fire departments.

Charts 1-3 show that IFPD receives a low volume of calls compared to its peers even when adjusting for the average number of staff.

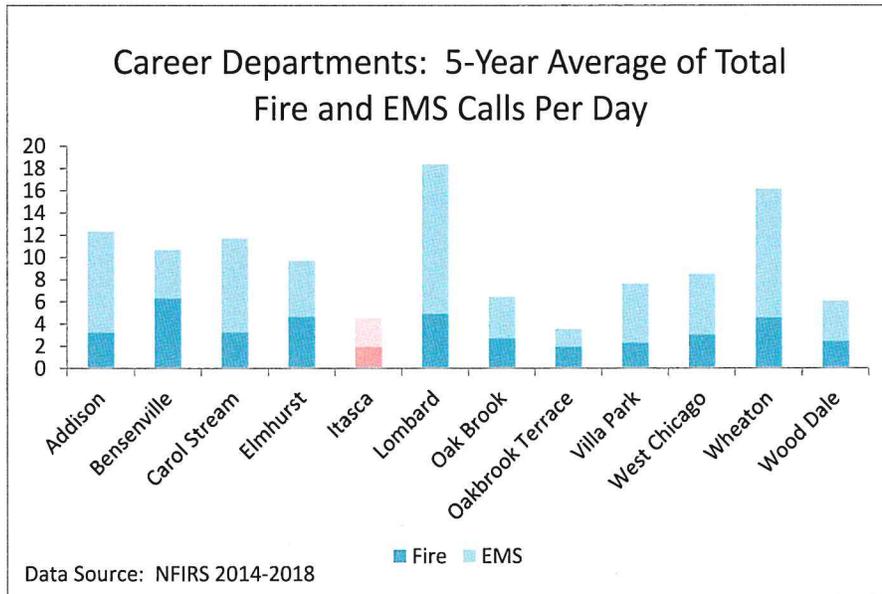

**CHART 1: THE CHART SHOWS THE 5-YEAR AVERAGE OF FIRE/EMS CALLS FOR MABAS DIVISION 12.<sup>11</sup>**

**IFPD averages 1,636 calls annually over the 5-year study period**

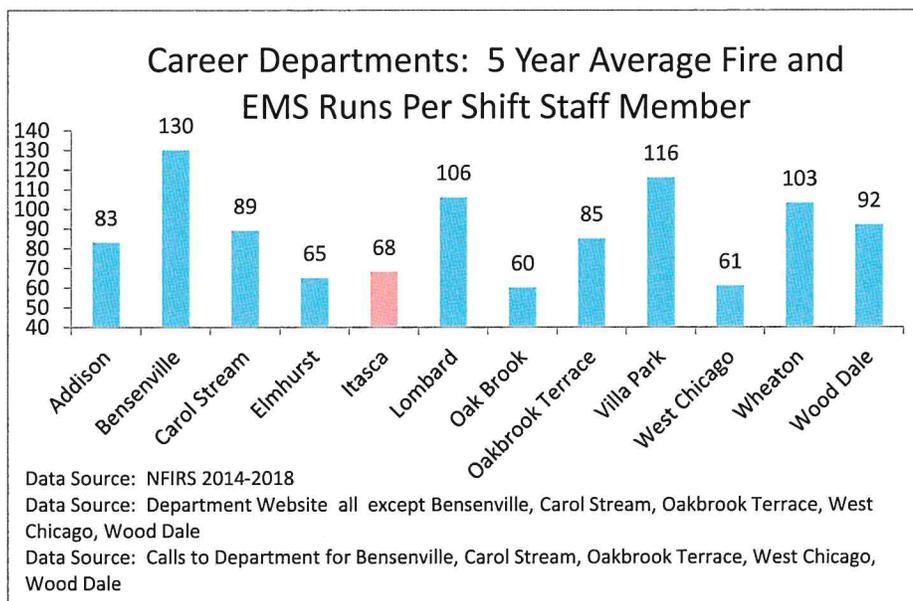

<sup>11</sup> See Appendix G, Appendix H for data source information

**CHART 2: THE CHART SHOWS THE TOTAL CALLS PER DAY BASED ON A 5-YEAR AVERAGE.<sup>12</sup>**

**IFPD averages 2.55 EMS calls per day and 1.93 Fire calls per day.**

**CHART 3: THIS CHART SHOWS MABAS 12 5-YEAR FIRE/EMS CALLS PER EMERGENCY RESPONSE SHIFT STAFF MEMBER.<sup>13</sup>**

<sup>12</sup> See Appendix G, Appendix H for data source information

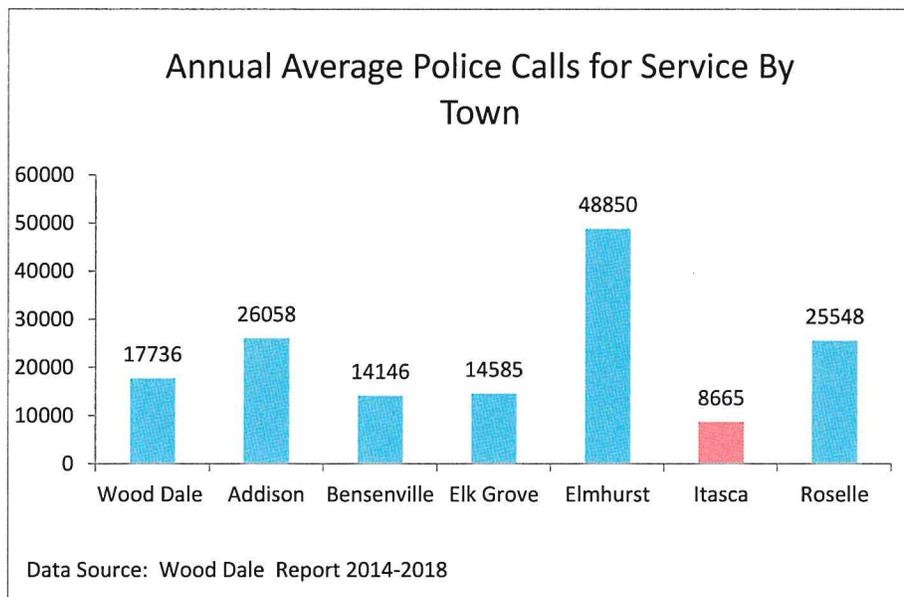

<sup>13</sup> See Appendix G, Appendix H for data source information

### Comparison Analysis of Itasca Police Department Capacity

Illinois police departments do not have a grouping system like MABAS. For the purposes of this study, the data contained in the Wood Dale Annual Reports (2014-2018) for the towns surrounding Itasca was used to calculate police call volume capacity to arrive at an impact analysis. Data obtained through FOIA requests on police responses to comparable treatment centers was also used in the impact calculations.

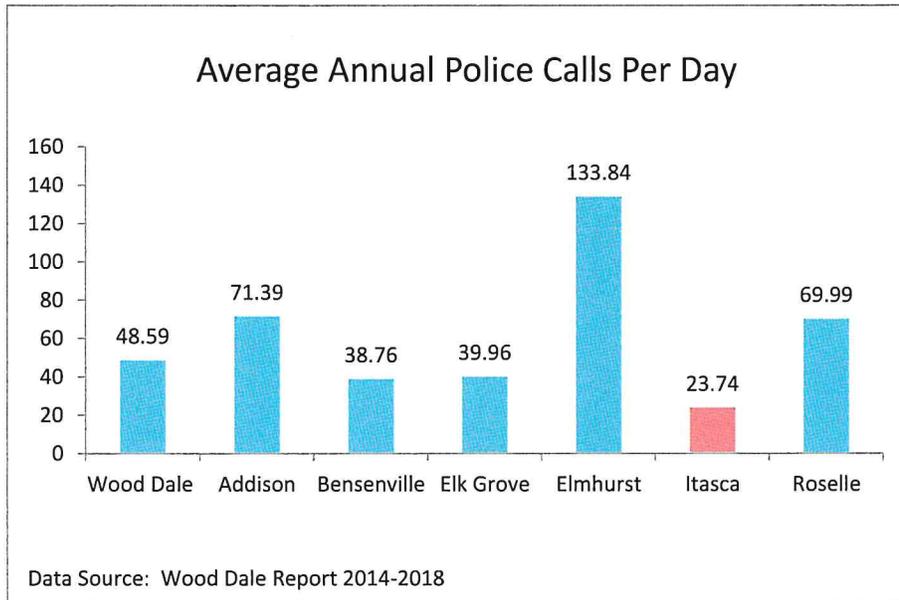

Data in the Wood Dale Annual Report provides statistics and comparisons for each study year for Wood Dale, Addison, Bensenville, Elk Grove, Elmhurst, Itasca, and Roselle. Charts 4-6 show that Itasca generates a low number of police calls compared to the surrounding communities.

**CHART 4: THIS CHART SHOWS THE 5-YEAR AVERAGE OF ANNUAL POLICE CALLS FOR THE COMPARISON COMMUNITIES.<sup>14</sup>**

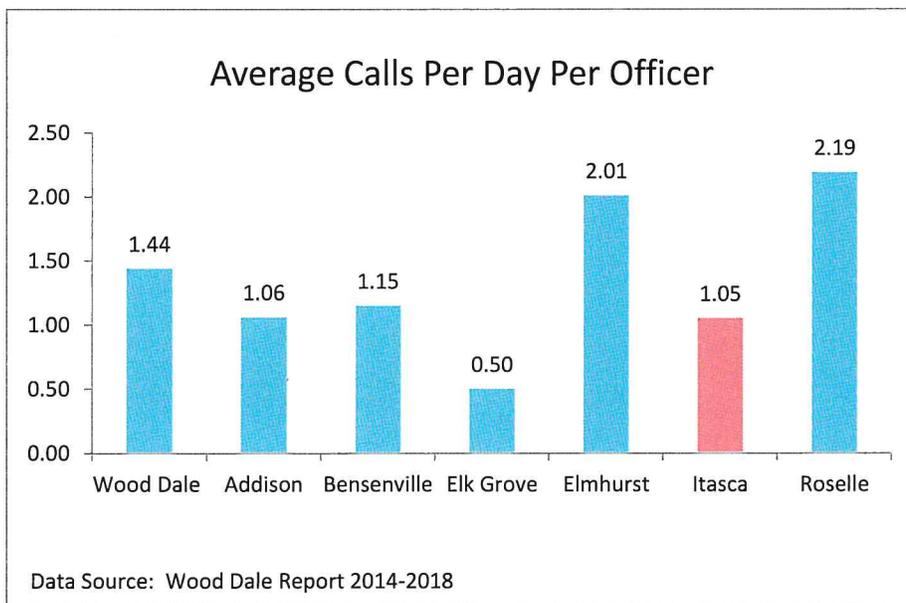

<sup>14</sup> See Appendix D for data source information

**CHART 5: THIS CHART SHOWS THE TOTAL POLICE CALLS PER DAY.<sup>15</sup>**

**CHART 6: THIS CHART SHOWS THE AVERAGE CALLS PER OFFICER PER DAY.<sup>16</sup>**

<sup>15</sup> See Appendix D for data source information

<sup>16</sup> See Appendix D for data source information

## Overview of Proposed Use of Private Ambulance

To minimize the use of EMS services provided by the IFPD, Haymarket DuPage has signed a contract with Elite Ambulance<sup>17</sup> to provide EMS services to Haymarket DuPage. Elite is the second largest ambulance company in Illinois with more than 140 ambulances available daily. Elite is able to provide both ALS and BLS care and has significant experience operating in Itasca. Elite currently provides both ALS and BLS ambulance services to Forest View Rehabilitation and Nursing Center at 535 South Elm in Itasca,<sup>18</sup> handling an average of 110 calls annually over the past five years.

In the event of any requirement for EMS services, Haymarket DuPage will require its trained medical staff to utilize a triage procedure for patients to determine the level of emergency care needed and when an ambulance should be called to transport a patient to the hospital. Through this triage procedure, Haymarket DuPage will determine if ALS or BLS care is needed. If BLS care is needed, Haymarket DuPage staff will request an Elite ambulance, rather than 911, service the call. In BLS call situations when a patient is in the care of trained medical professionals like those who will staff Haymarket DuPage, the extra few minutes potentially added for the BLS response by a private ambulance does not traditionally impact a patient's health status. Use of Elite will reduce the impact Haymarket DuPage could have on the IFPD and/or Itasca Police ensuring no interruption in service to Itasca community members.

For purposes of comparison, our research indicates that Elite will handle an estimated 39 BLS ambulance calls annually for Haymarket DuPage. It is important to note that Elite has been able to handle significant call volumes for Forest View which has limited the use of IFPD EMS services. This is the identical relationship being proposed for Haymarket DuPage.

---

<sup>17</sup> <https://www.eliteamb.com>

<sup>18</sup> NFIRS research data indicated the IFPD averaged 35 EMS responses annually to Forest View between 2014-2018.

**Comparable Suburban Treatment and Recovery Home Sites**

As stated above, Comparable Sites were assessed to predict the public safety service needs at Haymarket DuPage. The following Comparable Sites were chosen for study because they provide similar services to those to be provided by Haymarket DuPage. In addition, Polaris was able to confirm the number of beds on-site and years of operation. There was an extensive review of treatment facilities and recovery homes located in Chicago and the collar counties that were not ultimately included in this report. If Polaris could not confirm the number of beds or that the same or comparable levels of services were provided or have confidence in the data source (e.g. Chicago OEMC data), the sites were disqualified from consideration.

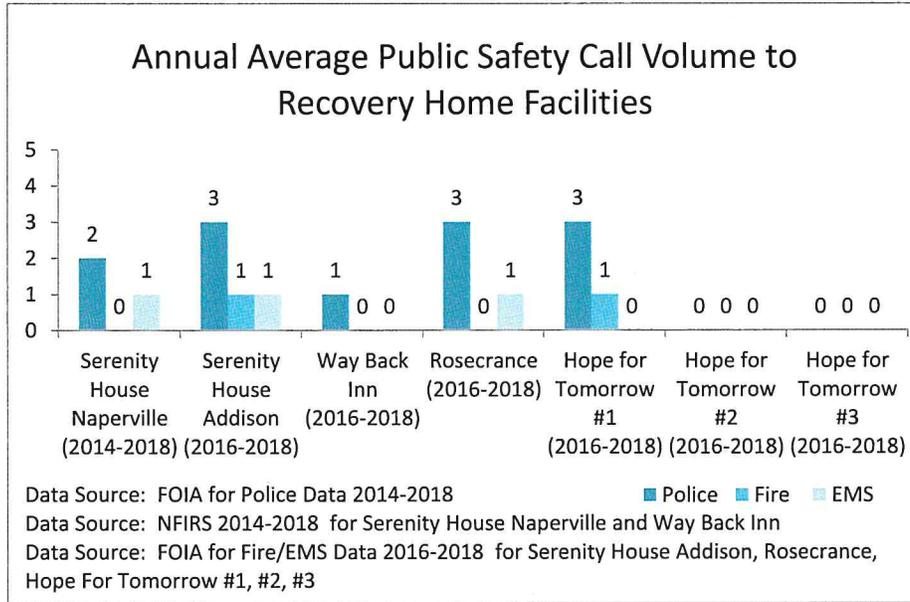

**CHART 7: COMPARABLE TREATMENT AND RECOVERY HOMES.<sup>19</sup>**

Name	Location	Years of Full Operation	Recovery Beds	Treatment Beds	Total Beds
Serenity House Naperville	1045 Alder Lane, Naperville	5	8	0	8
Serenity House Addison	871 S. Addison, Addison	3	12	0	12
Way Back Inn	141 N. 12th, Melrose Park	3	10	0	10
Rosecrance Recovery Home	874 Pleasant St.; 876 Pleasant St.; 894 Pleasant St.; 896 Pleasant St., Woodstock	3	16	0	16
Hope for Tomorrow #1	469 N. Lake St., Aurora	3	8	0	8
Hope for Tomorrow #2	537 Hartford Ave, Aurora	3	8	0	8
Hope for Tomorrow #3	652 Hartford Ave., Aurora	3	7	0	7
Amita Health	801 Gloucester, Elk Grove	1	0	48	48
Gateway Aurora	400 Mercy, Aurora	3	0	44	44
Heartland Banyan	1237 E. 1600 North, Gilman	2	0	36	36
Leyden Family Services	1776 Moon Lake, Hoffman Estates	5	0	40	40
		<b>Total Bed Count</b>	<b>69</b>	<b>168</b>	<b>237</b>

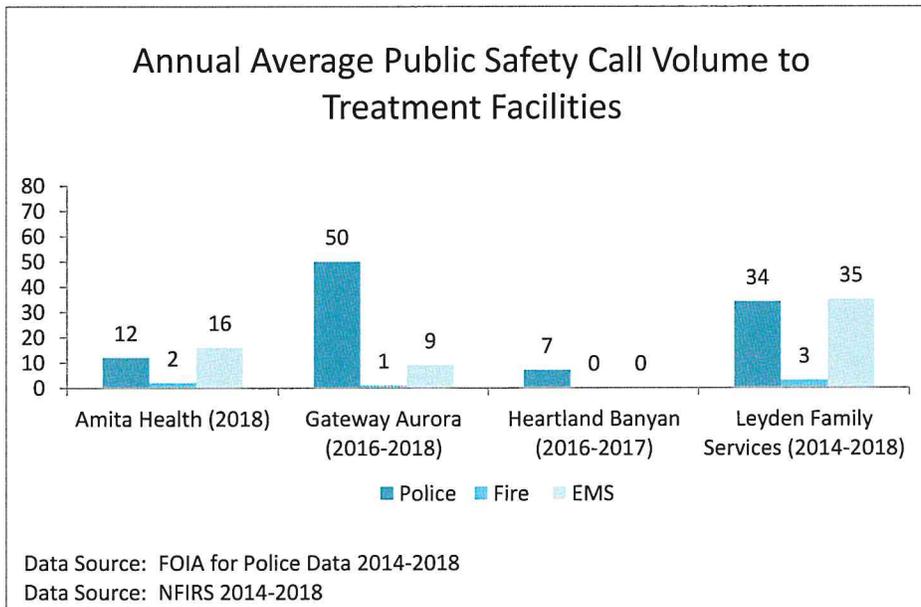

Polaris did not count partial years when a facility opened mid-year.

<sup>19</sup> See Appendix J for data source information

**CHART 8: THIS CHART SHOWS THE ANNUAL AVERAGE POLICE, FIRE, AND EMS CALLS FOR COMPARABLE RECOVERY HOME FACILITIES.<sup>20</sup>**

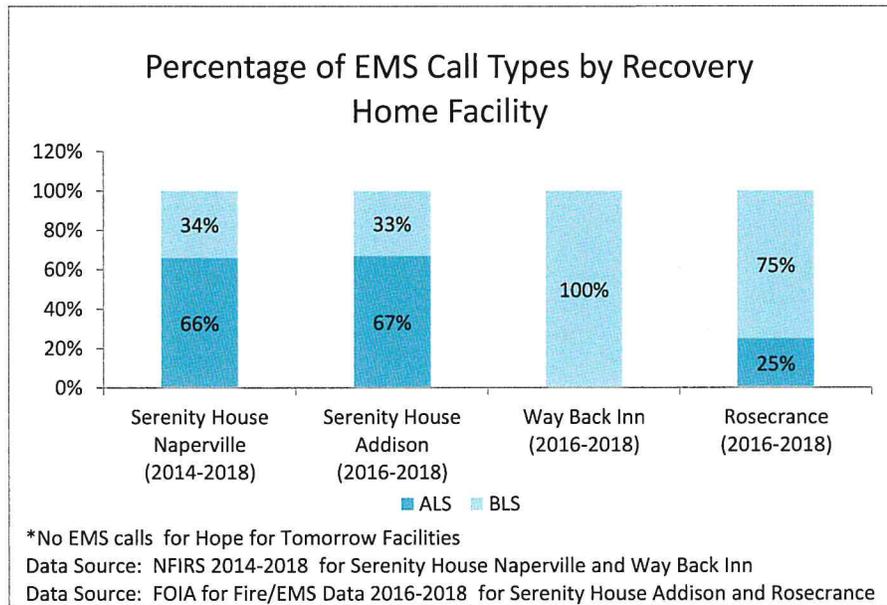

**CHART 9: THIS CHART SHOWS THE ANNUAL AVERAGE POLICE, FIRE, AND EMS CALLS FOR COMPARABLE TREATMENT FACILITIES.<sup>21</sup>**

<sup>20</sup> See Appendix I, Appendix L, Appendix M for data source information

<sup>21</sup> See Appendix I, Appendix L, Appendix N for data source information

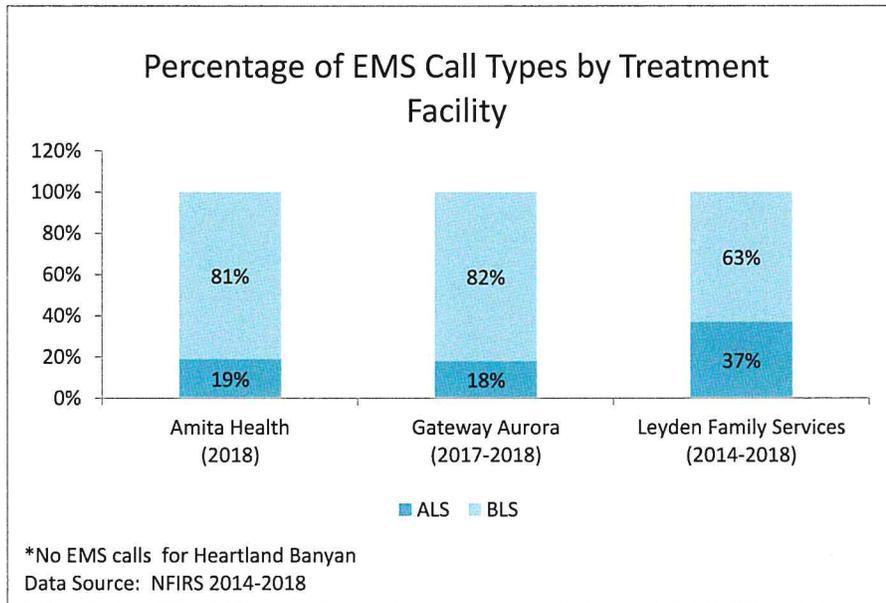

**CHART 10: THIS CHART SHOWS THE PERCENTAGE OF ALS/BLS CALLS FOR RECOVERY HOME FACILITIES.<sup>22</sup>**

**The research revealed 12 total EMS calls from 5 of the 7 comparable Recovery Home facilities over the study period. Because of the low number of EMS calls, the ALS/BLS breakdown of EMS calls may not be a true representation of the ALS/BLS call breakdown for a wider group of Recovery Homes. However, the Illinois and National ALS/BLS call breakdown averages provide for a smaller percentage of ALS calls. Polaris chose to be conservative and use the larger number of 40% ALS calls in order to ensure impact is not underestimated.**

<sup>22</sup> See Appendix L, Appendix M for data source information

**CHART 11: THIS CHART SHOWS THE PERCENTAGE OF ALS/BLS CALLS FOR TREATMENT FACILITIES.<sup>23</sup>**

**This research revealed 75% of EMS calls at the treatment facilities are BLS in nature.**

**Haymarket DuPage Impact to Public Safety Services**

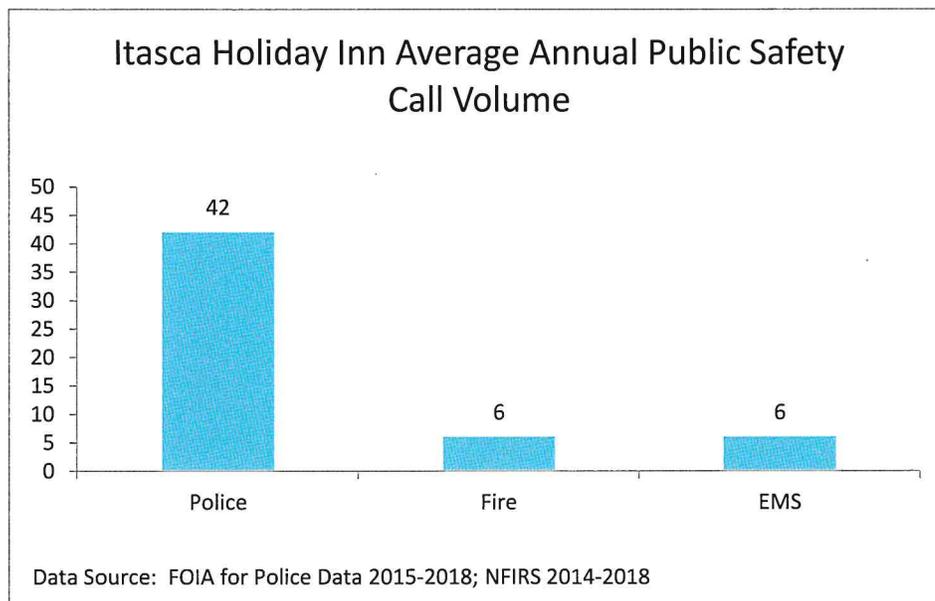

As discussed in the prior section, the most accurate data available to prepare these projections is the IPSDI and data obtained through FOIA for the Comparable Sites. Two different calculation methods were used to determine the total projected annual police, fire, and EMS impact that Haymarket DuPage will have on Itasca’s public safety services.

The two calculation methods used were the average of the yearly ratio of total calls to total beds and the average of each facility’s annual calls per bed for all entities included in the calculation. Each method was sensitive to the number of facility beds in operation for each data year. For example, if a facility was only operational for three years during the study period, then only three years of data was included and the averages were based on three years, not five years like other facilities for which five years of data was available.

<sup>23</sup> See Appendix L, Appendix N for data source information

To secure an accurate estimate of the impact on Itasca public safety services, it is important to include in the analysis the reported call volume response to the former Holiday Inn, as the public safety service providers had historical experience responding to the facility at current manpower and equipment levels.

**CHART 12: THE CHART SHOWS THE ANNUAL AVERAGE OF EMERGENCY CALLS TO THE FORMER HOLIDAY INN.<sup>24</sup>**

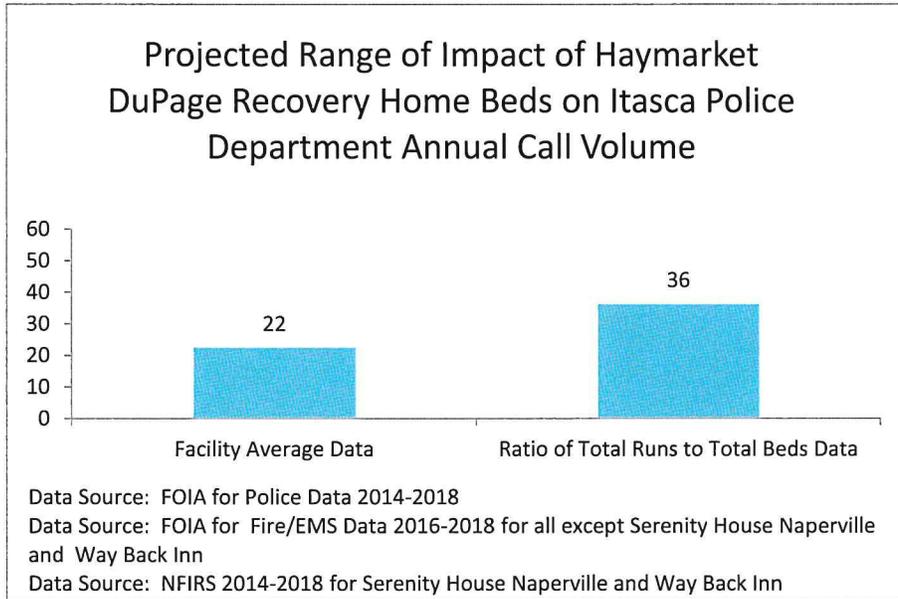

This report will now address the potential impact of Haymarket DuPage on police, fire, and EMS services.

### **Police**

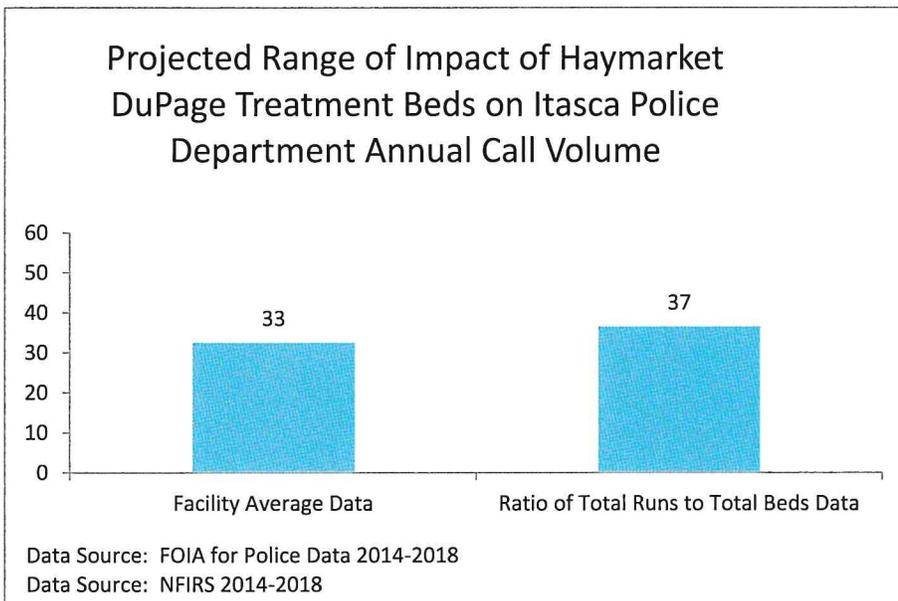

The impact to Itasca Police is based on the police-related calls that would require a police officer to respond. These projections are based on the 11 Comparable Recovery Home and Treatment Sites studied and removal of the BLS calls that would be handled by a private ambulance, and thus, not implicate a police 911 response.

<sup>24</sup> See Appendix K for data source information

**CHART 13: THIS CHART SHOWS PROJECTED IMPACT ON ANNUAL CALLS FOR POLICE DEPARTMENT FOR RECOVERY HOME BEDS.<sup>25</sup>**

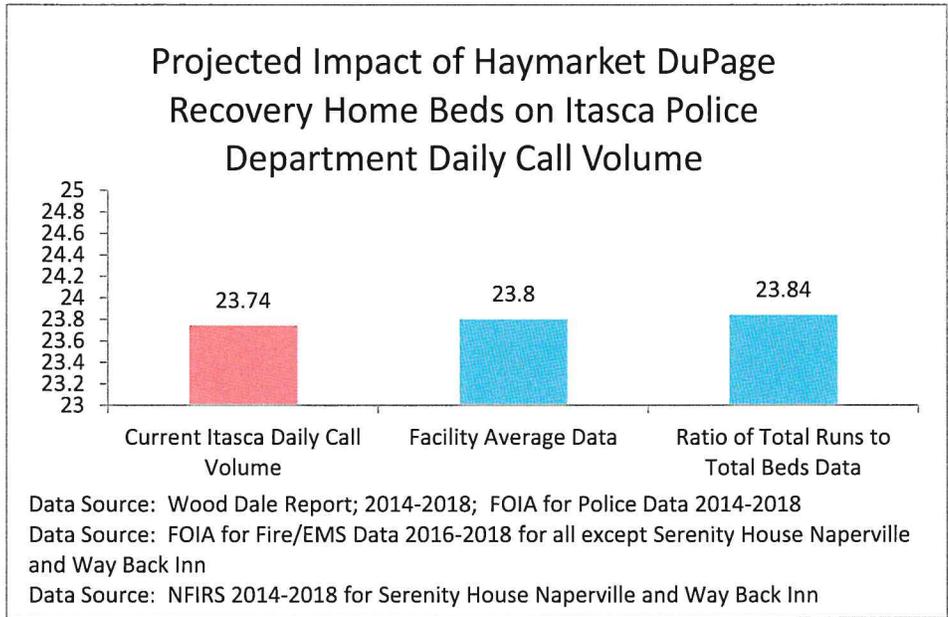

**CHART 14: THIS CHART SHOWS THE PROJECTED IMPACT ON ANNUAL CALLS FOR POLICE DEPARTMENT FOR TREATMENT BEDS.<sup>26</sup>**

<sup>25</sup> See Appendix I, Appendix L, Appendix M for data source information

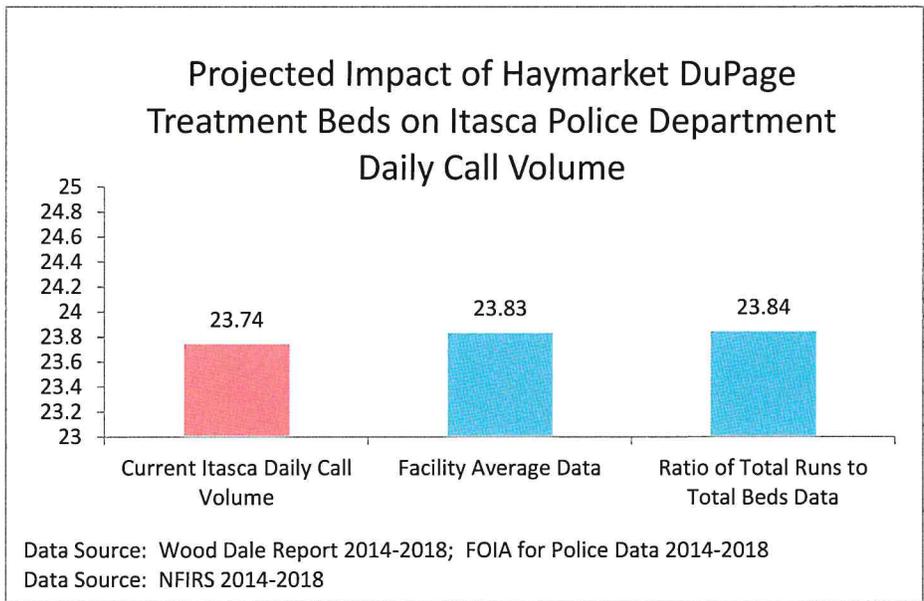

<sup>26</sup> See Appendix I, Appendix L, Appendix N for data source information

**CHART 15: THIS CHART SHOWS THE DAILY IMPACT TO ITASCA POLICE BASED ON RECOVERY HOME BEDS.<sup>27</sup>**

**The daily impact is .06-.10 police related calls per day**

**CHART 16: THIS CHART SHOWS THE DAILY IMPACT TO ITASCA POLICE BASED ON TREATMENT BEDS.<sup>28</sup>**

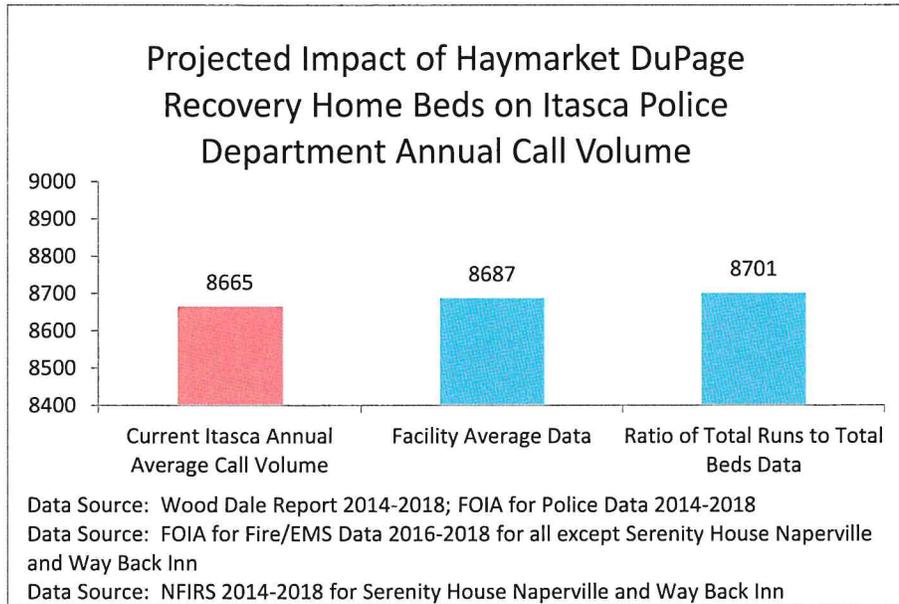

**The daily impact is .09-.10 police related calls per day.**

**The daily EMS ALS impact is .03-.04 calls per day**

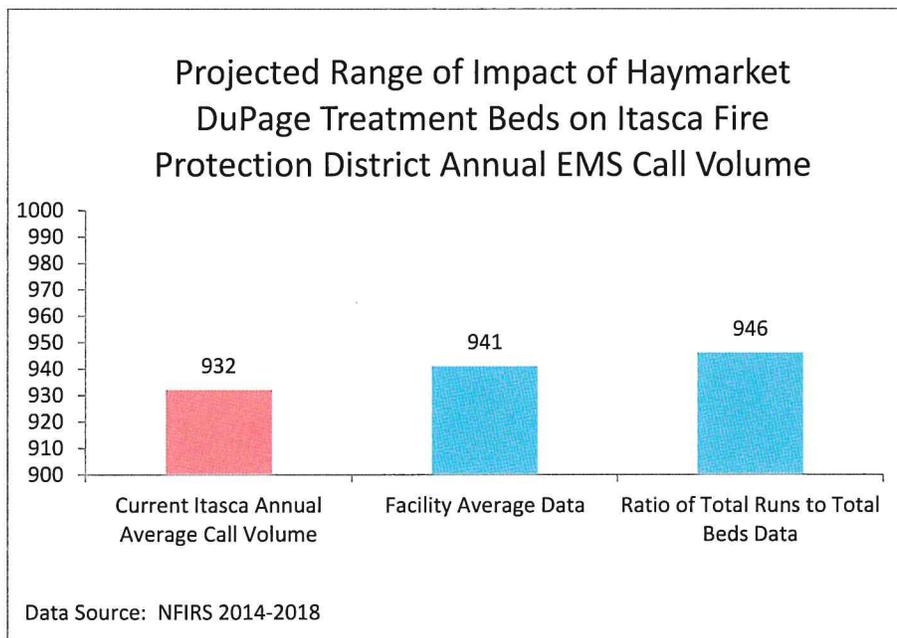

<sup>39</sup> See Appendix G, Appendix H, Appendix L, Appendix M for data source information

<sup>40</sup> See Appendix G, Appendix H, Appendix L, Appendix N for data source information

**CHART 29: THIS CHART SHOWS THE TOTAL ANNUAL EMS/ALS CALL IMPACT TO IFPD BASED ON RECOVERY HOME BEDS.<sup>41</sup>**

**CHART 30: THIS CHART SHOWS THE TOTAL ANNUAL EMS/ALS CALL IMPACT TO IFPD BASED ON TREATMENT BEDS.<sup>42</sup>**

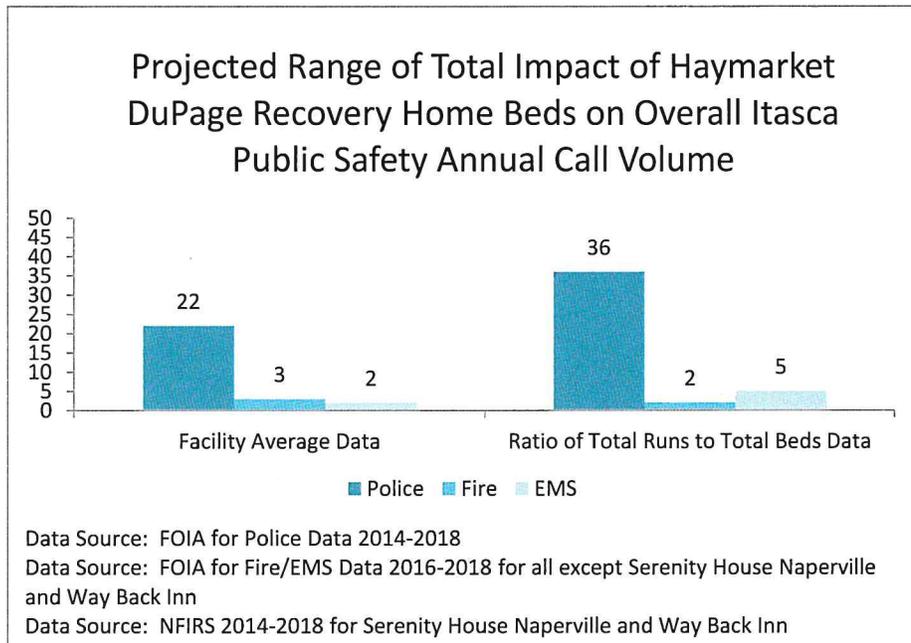

<sup>41</sup> See Appendix G, Appendix H, Appendix L, Appendix M for data source information

<sup>42</sup> See Appendix G, Appendix H, Appendix L, Appendix N for data source information

## Conclusion

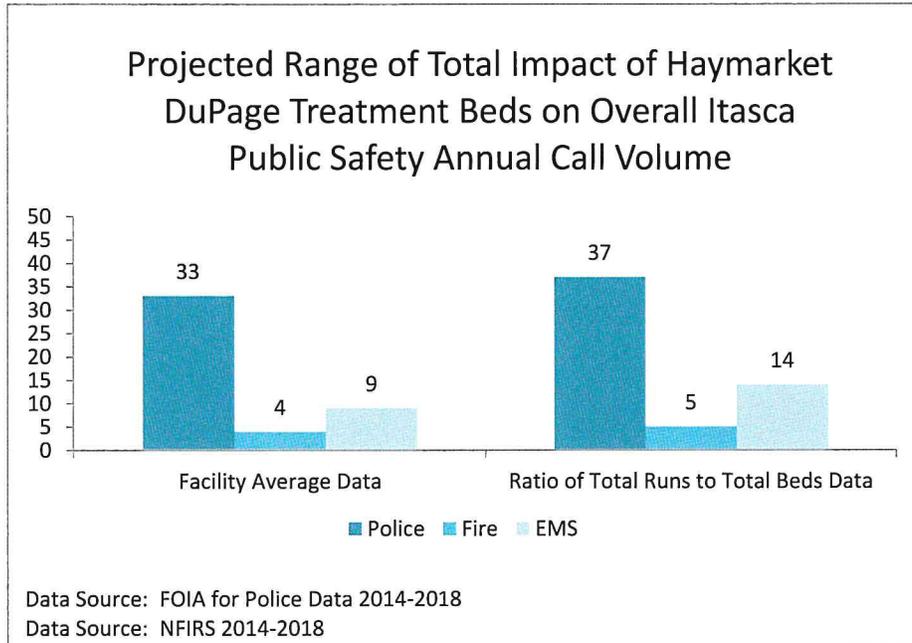

The charts in this section show the projected overall impact that Haymarket DuPage will have on the Itasca Police Department and IFPD based on the most reliable data used from Comparable Sites that provide similar services to Haymarket DuPage.

**CHART 31: SUMMARY OF OVERALL IMPACT BASED ON RECOVERY HOME BEDS.<sup>43</sup>**

<sup>43</sup> See Appendix G Appendix H, Appendix I, Appendix L, Appendix M for data source information

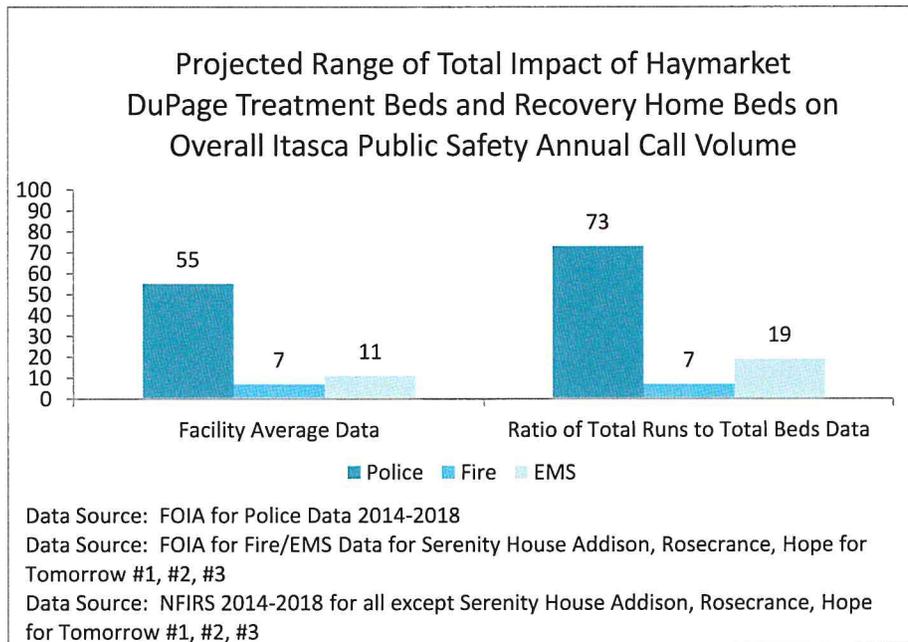

**CHART 32: SUMMARY OF OVERALL IMPACT BASED ON TREATMENT BEDS.<sup>44</sup>**

The projected total impact of Haymarket DuPage to Itasca’s emergency responders is negligible. The Itasca Police Department handles 8,665 calls per year. The potential that Haymarket DuPage will require 55 to 73 police responses to calls annually will not result in the need for additional staff or equipment. The same is true for IFPD. An increase of 18 to 26 fire and EMS calls per year added to the 1,636 current calls can be safely handled by IFPD with no adverse impact on response times, nor would such a small number of calls require an increase in manpower or equipment.

<sup>44</sup> See Appendix G, Appendix H, Appendix I, Appendix L, Appendix N for data source information

**CHART 33: SUMMARY OF OVERALL IMPACT.<sup>45</sup>**

As stated herein previously, this analysis factors in Haymarket DuPage’s contract with Elite Ambulance to respond to the BLS calls that are anticipated. Elite Ambulance was consulted and confirmed that it will be able to provide both ALS and BLS services similar to that it already provided 110 times on average annually from 2015-2019 to Forest View Rehabilitation and Nursing Center in Itasca.

Like the ambulance calls generated by Forest View Rehabilitation and Nursing Center, it is important to note that the number of ambulance calls to be generated by Haymarket DuPage will be reduced due to Elite’s BLS – and potentially its ALS - capabilities. This will further ensure that IFPD will have no reduction in the quality of services provided or response times. Forest View on averages uses an IFPD ambulance 35 times annually which is more than what is projected for Haymarket DuPage.

<sup>45</sup> See Appendix G, Appendix H, Appendix I, Appendix L, Appendix M, Appendix N for data source information

Even with the minimal increases in projected calls, Itasca's public safety agencies will continue to have sufficient capacity to handle these calls without the need for additional personnel or equipment. Haymarket DuPage will have a minimal impact on Itasca's public safety agencies and their ability to continue to provide high quality services to the community members that they serve.

## **WHO WE ARE?**

**Polaris Public Safety Solutions, LLC** is a public safety consulting firm founded by industry practitioners recognized for introducing efficient solutions to complex public safety problems. Our operational approach focuses on providing experienced resources to collaborate as a team to understand your environment and provide innovative solutions to drive your strategies and initiatives.

**Polaris Public Safety Solutions, LLC** offers professional service specializing in public safety, strategies, policies, operations, technology implementation, and planning. Over the past several years, members of our Team have been providing consulting services to law enforcement, fire service and emergency medical providers, as well as private industry companies addressing with public safety issues.

**Polaris Public Safety Solutions, LLC** works to understand our client's unique needs and develops custom solutions focusing on exceptional execution. In today's dynamic environment, public safety leaders face a formidable challenge delivering safety services. The disciplines comprising public safety must adapt to a changing world, both in organizational thinking, strategies, and operations. Polaris Public Safety Solutions, LLC can provide you with a forward-looking perspective that supports your organization's mission.

## **OUR PROMISE**

We will assist you in finding the best solution to your challenges. . Whether you are seeking recommendations on current public safety issues or problems, whatever your situation demands -- ***We have the resources to address your immediate needs at a reasonable cost***

## **OUR TEAM**

Our Team members come from diverse backgrounds working with consulting firms and as industry leaders. Polaris Public Safety Solutions, LLC team members can provide the effective and specialized services to help clients meet their changing needs. Top public safety officials and practitioners with decades of experience lead our team. We commit to bringing the best talent, with appropriate experience to any client engagement.

**Alan Berkowsky**, has been in the fire service for 38 years. He started his career with the Chicago Fire Department as a Paramedic. He then joined the Evanston Fire Department in 1981 as a Firefighter/Paramedic and then became Chief of the Department in 2004. Retiring from the Evanston Fire Department in 2010, he became Fire Chief for the Winnetka Fire Department in 2011 and is currently serving in that capacity. During his tenure with Evanston, Chief Berkowsky served as the Fire Marshal for a ten year period dealing with high-rises, stadiums, hospitals and many other complex structures. He was instrumental in identifying halogen lamps as fire hazards and in identifying the problems with carbon monoxide detectors when they first became publically available. He worked with Underwriters Laboratories on modifications to both of these products. During this period, he achieved his Arson Investigator certification. Chief Berkowsky obtained his Associate Degree in Fire Science from Oakton Community College and his Bachelor's and Master's Degrees from National Louis University. He served as an instructor for Oakton Community

College, Northeastern Illinois Public Safety Training Academy and the Illinois Fire Chiefs Association teaching Fire Officer I, Fire Officer II and Fire Prevention Programs. He currently instructs the Personal & Professional Development module for the OSFM Chief Fire Officer curriculum. Over the last three years, he has been an instructor for the Illinois Tactical Officers Association in the Rescue Task Force Curriculums. He has also served as President of MABAS Division 3 and as the Vice President of the Northeastern Illinois Public Safety Training Academy. Chief Berkowsky is the award receipt of the 2002 Wayne Leucht Humanitarian Award and the 2016 Illinois Fire Safety Alliance Life-Safety Award.

**Robert M. Buhs**, is the Executive Director of the Illinois Public Risk Fund since 2014 providing oversight to the Funds day-to-day operations. The Illinois Public Risk Fund is the largest self-insured risk pool in Illinois serving over 700 members. Bob retired as the Chief/Administrator of the Orland Fire Protection District (OFPD) after 27 years of full time service and 13 of those years as a Chief Officer. After retiring from the OFPD, Chief Buhs was appointed as the Executive Director of the Illinois Fire Chiefs Association serving until 2014. Bob has been actively involved in the fire service for over 45 years. Bob began his full-time career with Orland in 1977 and worked his way through the ranks. During his tenure as a Chief Officer, Bob help to guide the Orland Fire District through many successful projects and programs that have been recognized at both the state and national levels of government. Bob has obtained numerous State of Illinois certifications including Chief Fire Officer Designee, a Bachelor's Degree from Southern Illinois University in Fire Service

Management and a Master's Degree in Public Administration from Governors State University. Bob is active in numerous local and national organizations and associations. Bob has served as an adjunct instructor for Lewis University, Northwestern University and at workshops and seminars dealing with fire department management, accreditation, incident management, and strategic planning. In the private sector, Bob has also worked as a consultant for numerous firms conducting service level assessments which include staffing, station location and deployment studies. Bob is also the author of published articles entitled, "Minimizing Instructor Liability", and "What Color Is Your Aerial Ladder".

**Sean DeCrane**, retired as a 25+ year veteran of the Cleveland Division of Fire. He rose through the ranks and serving in various roles including the Director of Training and Acting Chief of Operations. He retired as a Battalion Chief covering Cleveland's Westside

Sean has been very involved in the research at Underwriters Laboratories and the National Institute of Standards and Technology. He serves on the UL Fire Council, is a member of the UL Fire Fighter Safety Research Institute's Advisory Board and is currently on a number of technical panels for research and standards. Chief DeCrane also represented the International

Association of Fire Fighters in the International Code Council process and has served on the 2009, 2012, 2105 and 2018 Fire Code Developing Committee and as Chair for 2015 and 2018. Sean served on the NFPA 1 Technical Advisory Panel, NFPA Research Foundation on Tall Wood Buildings and is serving as the Chair of the fire Test Work Group for the ICC Tall Wood Building Ad Hoc Committee. Sean has been awarded the 2015 UL Council Member's Achievement Award, 2014 Fire Equipment Manufacturer's Fire Safety Advocate of the Year Award, the 2013 International Association of Fire Chiefs Life Safety Award and the 2012 ICC-IAFC Life Safety Advocate Award. Sean has delivered a number of keynote addresses including the 2015 Fire Department Instructor's Conference. Currently Sean has been appointed as the UL Manager for Industry Groups and Association and Professional Organizations.

**James W. Dominik**, Jim is a third generation firefighter starting his career in Wilmette working his way up through the ranks to Fire Chief. Jim retired after 29 years of full time service and 20 of those as a chief officer. Jim has been the Chief Administrator for the Illinois Chief Fire Officer (CFO) Program since 2013. The CFO program is the only Office of the State Fire Marshal recognized Chief level training program. This program provides master degree level training to chief level officers. The program has been recognized in six other states and four other countries and continues to grow in attendance each year.

After retiring from Wilmette, Chief Dominik served as the Associated Director for the Northeastern Illinois Public Safety Academy (NIPSTA) assigned to the Chicago Fire Department. In this assignment he planned and coordinated many large scale operations in the City of Chicago. Most notably was the initial Active Shooter training for both the Chicago Fire and Police Departments. Jim also serves as a level one peer assessor for the Center for Public Safety Excellence (CPSE) for accreditation assessments of fire departments internationally and evaluation of candidates for Chief Fire Officer Designation (CFOD). During his career in Wilmette he led the fire department through dispatch center consolidation, Insurance Services Office (ISO) rating improvement, shared response arrangements, Accreditation, establishment of sprinkler ordinances and over nine million dollars in grant funding. Jim has obtained numerous State of Illinois certifications including Chief Fire Officer, a Bachelor's Degree from Southern Illinois University in Fire Service Management, a Master's Degree in Managerial Leadership from National Louis University and Executive Fire Officer (EFO) from the National Fire Academy. Jim is also one of the founding members of the advisory board for Underwriters Laboratories' Firefighter Safety Research Institute (FSRI). In 2010 Jim received Chief Fire Officer Emeritus status for his significant contributions to the fire service. He is active in numerous local and national organizations and associations. Jim is currently in his second term as a Village Trustee for the Village of Golf and is a licensed pilot with multiple ratings.

**Michael J. Mealer**, is a lifelong resident of Chicago and worked for the Chicago Police Department for over 32 years. He is a 1989 graduate of the Loyola University of Chicago School of Law and received his Master's in Security Studies from the Naval Postgraduate School in 2011. Michael attended the FBI National Academy in 2006 and concentrated his master's level studies there on leadership and counterterrorism. Michael ascended the ranks of the Chicago Police Department and retired as Commander and Executive Officer supervising and managing eight patrol districts covering over one third of the city of Chicago including the central business district, the lakefront and all major entertainment venues except Wrigley Field.

During his tenure as Commander of Intelligence he held an FBI issued Top Secret/SCI clearance. His past work includes: planning and managing major city events such as Lollapalooza, the Air and Water Show, the Independence Day Fireworks and holiday and ethnic parades and celebration; reorganizing the functions, structure and operations of the Evidence & Recovered Property Section to improve efficiencies and promote accountability; leading intelligence planning, operations and interagency coordination for the May 2012 NATO Summit; and designing, implementing and delivering training. Michael's experience also includes developing strategies, operation plans and drafting policy and procedure. Michael has practiced law, taught criminal justice college classes, wrote the Chicago Public School *Safe School Plan*, and was on an interagency curriculum review team for the Center for Domestic Preparedness. Michael is active in several professional organizations and a national board member for the Fellowship of Christian Peace Officers, USA. Michael's interests include counterterrorism and homeland security with a concentration on radicalization issues. His master's thesis, *Internet Radicalization: Actual Threat or Phantom Menace*, has been cited by several academics.

**Peter Van Dorpe**, is Fire Chief of the Algonquin-Lake in the Hills Fire Protection District. In 2013 retired as Director of the Chicago Fire Department's Training Division after a 33 year career with the CFD. He holds a Bachelor's degree in Fire Science Management from Southern Illinois University. He has made presentations on modern fire ground challenges at FDIC, Firehouse Expo, Fire Rescue International and the National Fire Academy. In 2012 he delivered the General Session Keynote at FDIC and addressed the U.S. Senate Appropriations Subcommittee on the "*Flammability Standards and Flame Retardant Chemicals*". In addition to his work as a Field Instructor for the Illinois Fire Service Institute, he has been a lead instructor for the Chicago Fire Department's Fire Officer School, and has taught building construction for the fire service through the City Colleges of Chicago. He is a member of the Advisory Board for Underwriters Laboratories' *Firefighter Safety*

*Research Institute* and Board of directors of the International Society of Fire Service Instructors. He has participated as a Subject Matter Expert for UL's research on *Firefighter Safety*, NIST's, "*Evaluating Firefighting Tactics Under Wind Driven Conditions*", the IAFF "*Firefighter Safety and Deployment Study*" in high rise buildings, and several NIOSH Line of Duty Death investigations. Chief Van Dorpe is the 2016 recipient of the Fire Engineering/ISFSI George D. Post Instructor of the Year award.

**John McNicholas**, Retired Deputy Fire Commissioner of Operations for the Chicago Fire Department. Following in the footsteps of his Father, Grand Father and many other family members who proudly served the Chicago Fire and Police Departments, John Served the Chicago Fire Department for over 36 years before retiring in 2016. He was promoted through the ranks and served throughout the city and the various bureaus within the department. As a Chief Officer he was responsible for the emergency operations of Chicago's O'Hare International Airport and later in his career was appointed to the rank of District

Chief of Airport Operations which included O'Hare and Midway International Airports during the time of the O'Hare Modernization Project. He was later appointed to the Rank of Assistant Deputy Fire Commissioner of Fire Operations for the department and years later to the position of Deputy Fire Commissioner of Fire and EMS Operations. During his tenure at the Commissioner level, John was responsible for daily operations to include staffing, training, discipline, department oversight, review and revision of department policies and procedures and inner agency planning for large scale events. He was the commander of 4800 uniformed members through the multiple Fire and EMS Districts of the department. John has been an active participant involving acquisitions of tools, equipment and apparatus, fire station planning and location/relocation and placement/replacement of Fire and EMS apparatus. He has conducted multiple surveys on Fire and EMS safety garments leading to the Chicago Fire Department's acquisition of the current station wear and turnout garments. Known to be a strong, confident leader within the Chicago City Government, he worked closely with all city agencies and was responsible for drafting Incident Action Plans and Overview Plans for every major city event including the NATO Summit, NFL Draft, Playoff events and Championship parades. Taste of Chicago, LALA Palooza, Jazzfest and other notable concert events. His experience in taking command and managing of large scale Fire and EMS emergencies was invaluable to the city and the department. Through his experience, John educated countless younger members and future leaders by engaging in promotional and training evolutions and classes throughout his career.

**James Dominik**  
***Managing Member***  
jdominik@polarispss.com

---

**Professional Experience**

**Job Title:** Managing Member  
**Employer:** Polaris Public Safety Solutions, LLC  
**Dates of Employment:** June 2017 to present

**Duties and Accomplishments:**

This small business provides consulting services to assist fire service, emergency medical service providers, law enforcement, and private industry clients to develop the most effective and cost-efficient solutions to the challenges faced.

- Lead fire service client engagements, with a focus on risk assessment and training.
- Lead private sector client engagements, with a focus on code compliance, code advancement, and serving as a liaison with public safety agencies.
- Served as an expert witness in both state and federal court cases.

**Job Title:** Associate Director  
**Employer:** Northern Illinois Public Safety Training Academy  
**Dates of Employment:** 2015 to 2017

**Duties and Accomplishments:**

- Created a first ever partnership with the Chicago Fire Department for regional training and cooperation that resulted in a 15-year intergovernmental agreement.
- Created and lead active shooter programs for Chicago Police and Fire Departments.
- Created and lead fire service and fire prevention training.
- Responsible for nine million dollars in grant funding for tactical training props.
- Created training programs for all aspects of the fire service

**Job Title:** Fire Chief  
**Employer:** Village of Wilmette  
**Dates of Employment:** 2006 to 2015

**Duties and Accomplishments:**

- Selected to plan and coordinated a terrorism response exercise for President Bush and other dignitaries after 9/11 to help world leaders understand the capabilities and needs of emergency responders necessary to protect the public.
- Significantly increased training, professional development, and community outreach for the Department.
- Developed and executed plans to successfully improve the Village of Wilmette's ISO rating from 4 to 2 without additional staffing or funding.

- Created, planned, and implemented the Village of Wilmette's first fire sprinkler ordinance using a life safety evaluation process for compliance.
- Developed and implemented multi-community joint response agreements to produce a more effective immediate response.
- Developed and implemented plans that created ambulance fees, false alarm fines and fire prevention revenue for the Village.
- Created and implemented a truss construction marking system that resulted in improved firefighter safety for all commercial buildings that is now being used in many areas across the country.
- Served as the Department's sole management representative for labor negotiations with the firefighter's union that ultimately resulted in the first voluntary labor contract and a successor agreement.
- Planned and coordinated all phases of the hiring and promotion process for the positions of Firefighter, Lieutenant, Duty Chief, and Deputy Fire Chief.
- Handled all union grievances at step one.
- Obtained over 1 million dollars in grant funding.
- Re-engineered the Fire Prevention Bureau with new model codes.

**Job Title:** Deputy Fire Chief  
**Employer:** Wilmette Fire Department  
**Dates of Employment:** 1997-2006

**Duties and Accomplishments:**

- Served as the Department accreditation manager; successfully leading the Department through its first re-accreditation site visit and achieving re-accredited status.
- Served as the construction manager for the 4-million-dollar renovation of two fire stations.
- Lead the Fire Prevention Bureau
- Prepared specifications and supervised the design and construction of fire apparatus.

**Job Title:** Duty Chief (1995-1997)  
 Lieutenant (1990-1995)  
 Firefighter (1985-1990)

**Employer:** Wilmette Fire Department  
**Dates of Employment:** 1985-1997

**Duties and Accomplishments:**

- Provided fire suppression and rescue services to a residential population of 27,000 in a suburban community, with progressive responsibility for supervision of firefighters assigned to the same fire company and all firefighters and companies assigned to the shift.
- Served as the Director of the Fire Prevention Bureau for 18 months. Responsibilities included issuing permits for fire protection systems; providing public education and fire safety awareness programs; investigated fires for cause and origin; enforcing fire, building, and life-safety codes and ordinances; conducting fire and life-safety

inspections; reviewing plans for fire protection systems and life safety systems; witnessing the testing of fire protection and life safety equipment; and maintaining public relations while responding to citizens' inquiries and fire-safety related concerns.

- Obtained Paramedic Certification.

**Job Title:** Trustee  
**Employer:** Village of Golf, Illinois  
**Dates of Employment:** 2013- Present

**Duties and Accomplishments:**

- Serve as an elected trustee for the governance of the Village.
- Responsible for all emergency management functions for the Village.

**Job Title:** Chief Administrator  
**Employer:** Illinois Fire Chiefs Association  
**Dates of Employment:** 2013- Present

**Duties and Accomplishments:**

- Created and coordinate the Chief Fire Officer Program, which is the highest and only approved chief-level state certification program. This program, which provides masters degree level training to chief level officers, has been recognized in six other states and four other countries and continues to grow in attendance each year.
- Teach the course curriculum.

**Job Title:** Advisory Board Member  
**Employer:** Underwriters Laboratories Firefighter Safety Research Institute  
**Dates of Service:** 2009- Present

**Duties and Accomplishments:**

- Founding member of the Advisory Board.
- Responsible for guiding the work of the Firefighter Safety Research Institute (FSRI). The FSRI advances fire research knowledge and develops cutting edge, practical fire service education aimed at helping firefighters stay safe while more effectively protecting people and property. This is accomplished through investigating residential, commercial, and industrial fires through full-scale testing, field testing, and fire modeling to replicate actual fires faced by firefighters. Research results are vetted through academic training courses that have reached hundreds of thousands of firefighters.
- Provided board level education on fire safety and fire service operations.

**Job Title:** Chief of Training  
**Employer:** Illinois Mutual Aid Box Alarm System Division III  
**Dates of Service:** 1999-2006

**Duties and Accomplishments:**

- Created training plans and response exercises for the 18 communities in MABAS Division III.

**Job Title:** Level 1 Peer Assessor  
**Employer:** Center for Public Safety Excellence  
**Dates of Service:** 2009- Present

**Duties and Accomplishments:**

- Assessor for Chief Fire Officer Designation. Professional Credentialing is a career enhancement and development model that recognizes professional accomplishments and technical competence of fire and emergency service officers.
- Assessor for fire department accreditation. Agency accreditation is an all-hazard, quality improvement model based on risk analysis and self-assessment that promotes the establishment of community-adopted performance targets for fire and emergency service agencies.

**Education and Training**

**National Louis University- Chicago, Illinois**  
Masters Degree in Managerial Leadership

**Southern Illinois University - Carbondale, Illinois**  
Bachelor of Science in Fire Service Management

**Oakton Community College - Des Plaines, Illinois**  
Associate Degree in Applied Science In Fire Service Technology

**National Fire Academy Executive Fire Officer Program**

Research reports written as part of coursework:

- Determining Customer Satisfaction in the Fire Service (1997)
- Determining the Need to Prepare the Village of Wilmette for a Terrorist Act (1998)
- Evaluation of a Fee Based Emergency Medical Services Program for the Village of Wilmette (1999)
- Leadership in the Wilmette Fire Department (2000)

## **Licensures and Certifications**

Certified pilot with multiple ratings  
Chief Fire Officer Designation (68<sup>th</sup> to achieve internationally)  
Fire Apparatus Engineer  
Fire Instructor I & II  
Fire Investigator  
Fire Officer I, II, III & Chief Fire Officer  
Fire Prevention Officer  
Firefighter II & III  
Hazardous Materials Operations  
Hazardous Materials Technician  
Roadway Extrication Specialist  
Training Program Manager

## **Professional Affiliations**

Illinois Fire Chiefs Association Education and Research Foundation - Board Member  
Illinois Professional Firefighters  
International Fire Chiefs Association  
National Fire Protection Association  
St. Francis Hospital EMS Advisory Committee - Board Member

# NFIRSGram: Three reasons why the National Fire Incident Reporting System is important

The fire service responds to all types of emergency and nonemergency incidents. The full effect of those responses is only realized if the incidents are documented, reported, shared and analyzed. The fire service's tool for achieving this full effect is the National Fire Incident Reporting System (NFIRS).

NFIRS is the largest database of fire incidents in the world. Fire departments in all states participate in NFIRS. From 2009-2018, 244 million incidents were reported in NFIRS to the U.S. Fire Administration (USFA). More than 28.4 million incidents were reported in 2018.

- An incident is reported in NFIRS every 1.1 seconds.
- An emergency medical services/rescue incident is reported every 2 seconds.
- A fire incident is reported every 27 seconds.

## Why is NFIRS important to the fire service?

### 1. NFIRS helps the fire service quantify what it does.

We are connected to data in many of our day-to-day activities (e.g., communicating, relaxing, traveling and working). Everything we do seems to be data-driven. This data is collected and leaves behind a data footprint of our activities.

For the fire service, NFIRS leaves sets of data footprints behind that track and quantify the activities of the fire departments in the United States. NFIRS documents the emergency and nonemergency response activities of fire departments while allowing the fire service to tell its story in an objective manner through its data.

### 2. NFIRS allows the fire service to speak the same language when comparing and sharing its data.

Data is an effective component in communication. The fire service uses NFIRS as an acceptable, common and proven way of communicating because NFIRS is the national standard that fire incident reporting software uses to collect and report emergency response activities of the fire service. It is based on the National Fire Protection Association standards that are overseen by the Technical Committee on Fire Reporting.

More than 24,000 fire departments — 80 percent of all fire departments in the U.S. — participate in NFIRS. This common language — NFIRS — allows the fire service and other users of NFIRS to document, analyze, and report their data.

### **3. NFIRS is a critical business asset.**

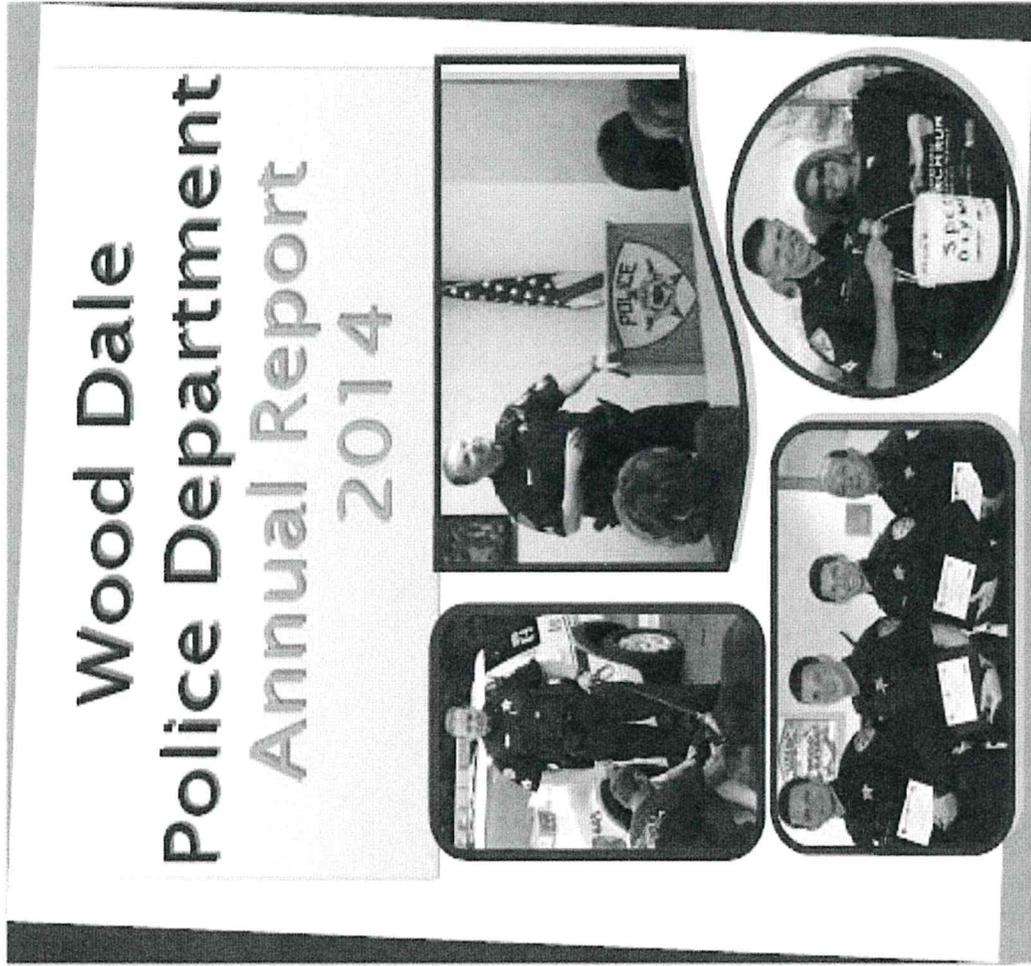

The fire service must understand that NFIRS data is a critical business asset. An asset is something of value that adds worth. NFIRS data is an asset because it allows users of NFIRS to identify trends, quantify activities, determine causes, plan the deployment of limited resources, and help in the reduction of loss of life and property caused by fires.

For more information about NFIRS, please contact the NFIRS Support Center: Monday – Friday between 8 a.m. – 4:30 p.m. ET, at 888-382-3827, or by email at [fema-nfirshelp@fema.dhs.gov](mailto:fema-nfirshelp@fema.dhs.gov).

# Too Many Medics? Debating a Tiered Response vs. All-ALS EMS System

By Stephen P. Wood, MS, ACNP-BC and Benjamin Podsiadlo, EMT-P | 4.16.19

There's been an ongoing debate in EMS, emergency medicine and fire service literature regarding whether or not having too many paramedics practicing at the ALS level leads to skill degradation and negative patient outcomes.

These concerns have stemmed from the growing number of ALS-only EMS systems across the United States—a departure from more regionalized systems of ALS, where a paramedic unit (or units) served a number of communities that were supported by BLS services.

These systems are largely being replaced by instituting paramedic services in all communities, and includes both paramedics staffing ambulances as well as first responding engine companies. This has led to the “paramedic on every corner” philosophy that's a good sell to communities and its constituents.

In a recent editorial in *Firehouse Magazine*, Chief Gary Ludwig argues that more paramedics isn't necessarily a bad thing.

The argument that scaffolds Chief Ludwig's argument is that even if paramedics aren't getting skill maintenance in the field, these skills can be maintained through practice through simulation or in a skills lab setting. He argues that by the same logic, we should have fewer firefighters based on the decreased number of fires in the past 25 years.

## **JEMS: Ambulance Crew Configuration: Are Two Paramedics Better Than One?**

It's true, fires have decreased in the last few decades, which has led to a change in the landscape of the fire service and the services they provide. It's true as well that the provision of EMS needs a re-evaluation, providing the services that best meet the needs of the community.

To argue that more is better, however, isn't really the answer. Better is better, and that all comes down to skills and training. It also means that fewer, highly trained, well-educated professionals should be the ones who are providing it. I think Chief Ludwig would agree: having a small group of excellent firefighters is better than having a whole lot of adequate ones—or worse yet, below-average ones.

## **Tiered Response vs. All ALS**

To answer the question of, “is more really better?”, it’s important to first evaluate the benefits of regional paramedics vs. an all ALS-system. In the tiered response system, paramedic (ALS) units are staffed to cover several regionally approximate communities, one large urban area or some combination of both. This tiered-response model is supported by the provision of BLS care either by the fire service or private EMS.

The benefit of this is that communities can develop excellent BLS providers who can activate ALS when it’s appropriate, using clinical gestalt that’s supported by protocols. This would mostly include emergencies where an immediate intervention, such as airway management, administration of medications, or advanced procedures like needle chest decompression are required. The ALS interventions that are truly time sensitive are few in number and in the tiered response EMS system, ALS services are reserved for these circumstances.

The result of a tiered response system is that the paramedics in this system are typically engaged in the provision of more advanced level care, allowing for maintenance of clinical decision-making, diagnostic acumen and practical skills maintenance.

The volume of EMS calls that are likely to require ALS is actually quite small. The data in the literature on this is now decades old, but it’s estimated that only between 2–20% of calls may require an advanced intervention.<sup>1,2,3</sup> Considering the advent of automated external defibrillators, the increased use of epinephrine autoinjectors and naloxone among BLS providers and the de-emphasis of advanced airways and medications in advanced cardiac life support, these figures may be a conservative estimate. Those who are proponents of the tiered response system support that fewer is more, as the paramedics in this system are practicing at a higher volume. The system benefits as well in that patients are triaged more appropriately, which likely has some financial impact as well.

In an all-ALS system, every ambulance—and in some cases non-transporting engine companies—are staffed by paramedics. This increases access to paramedic services for all emergency calls for service. Those who favor the all-ALS system argue that faster on-scene times and more ALS providers on a single scene is beneficial, despite the paucity of data to support it. There’s potentially some advantage to quicker access to ALS, as response times of an ALS unit may be shorter in some critical scenarios. There’s been some argument that more paramedics on scene can lead to better patient care, although the limited research in this area argues this isn’t the case.<sup>1</sup>

Where the answer lies is difficult to navigate, because the quality and quantity of the literature supporting the all-ALS system is practically nonexistent. Few of the available articles on this topic are authored by the very people it effects the most: the EMS providers. Most EMS research is driven by physicians, which ultimately means we aren’t navigating our own ship.

Skill maintenance seems to focus mainly on intubation, something that—although important—speaks to only a very small part of what EMS providers do. Recognition of critical illness, expert clinical decision-making and diagnostic acumen are rarely accounted for in these research studies, but are likely far more important. This skill set definitely comes from practice and pattern recognition, something that’s difficult to reproduce even in the best simulation setting.

Looking at other medical practice settings, volume does equal mastery. This is true in surgery, in cardiac catheterizations and in anesthesia.<sup>5-7</sup> We suspect that the same is true in EMS. Paramedics who practice their trade with greater frequency are more likely to have the necessary skill set when it's needed the most.

This also shouldn't be about fire service vs. private or third service, municipal EMS. The fire service can develop tiered response systems that are regionalized and cooperative as well. In fact, some of the best examples of this come from the fire service. This is all about developing the best EMS system, or better yet, developing *an* EMS system.

## Navigating Our Own Ship

What this should look like involves better paramedic training with minimum degree requirements, improved access to ongoing education, as well as a practice environment that can help ensure adequate volume and skills maintenance as clinicians. It also means that we need to be the drivers of the research that evaluates and re-evaluates these programs to ensure efficacy. The focus of this research needs to be on patient-oriented outcomes and needs to clearly demonstrate the efficacy of the system in place.

Chief Ludwig isn't wrong. Having a large pool of paramedics can be a good thing. They need to be highly trained and there need to be systems in place to ensure skill maintenance.

The product that paramedics deliver extends well beyond simple skills. It includes clinical decision-making, pattern recognition and diagnostic acumen that can't always be taught in a simulation lab. Just like you don't need the hazmat unit for every fire call, or a SWAT team for every law enforcement response, you don't always need ALS either. When you need them, you need them—and you want them to be at the top of their game.

It's true: “more” *is* better! But the “more” is: *more* education, *more* research and *more* patient volume.

Janet Stengle

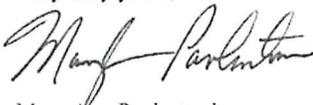

Dear Ms. Stengle:

Pursuant to your Illinois Freedom of Information Act ("FOIA") request (the "Request"), on May 12, 2020, the Village of Melrose Park has enclosed all documents that were responsive to said Request.

Thank you for your interest in the Village of Melrose Park.

Should you have any other questions, please do not hesitate to contact me.

Very truly yours,

Mary Ann Paolantonio  
 Village Clerk  
 FOIA Officer  
 Village of Melrose Park

Total Police calls and for 141 N 12th.pdf

Community	Year	Total Police Calls	Total Police Calls Per Officer	Total Fire/EMS Calls
Melrose Park	2014	31,846		
Melrose Park	2015	33,442		
Melrose Park	2016	29,679		
Melrose Park	2017	30,986		
Melrose Park	2018	32,070

Elk Grove Fire and Police Calls Response.pdf

Dear Ms. Stengle,

I have received your request for Police Calls for Service stats for 2014 through 2018. Our response is attached on your Exhibit A. Please note that we do not collect data on Calls for Service per officer. Also, please note that Fire/EMS will be responding to your request under a separated cover.

If you have any questions or need additional information, please feel free to contact me.

*Donna Freidenfelds*

**APPLICABLE EXEMPTION CIRCLED BELOW**

- 1. Information specifically prohibited from disclosure by State or Federal law, or rules and regulations implementing State or Federal law. FOIA Sec. 7(1)(g)
- 2. Private Information - means unique identifiers including a person's social security number, driver's license number, employee identification number, biometric identifiers, personal financial information, passwords or other access codes, medical records, home or personal phone numbers, and personal e-mail addresses. Private information also includes home address and personal license plates, except as otherwise provided by law or when compiled without possibility of attribution to any person. FOIA Sec. 7(1)(b)
- 3. Personal Information - Information which, if disclosed, would constitute a clearly unwarranted invasion of personal privacy, unless the disclosure is contained in a writing by the individual subject of the information. FOIA Sec. 7(1)(c)
- 4. Records in the possession of any public body created in the course of administrative enforcement proceedings and any law enforcement or contractual agency for law enforcement purposes, but only to the extent that disclosure would
  - A. Interfere with pending or actually and reasonably contemplated law enforcement proceedings conducted by any law enforcement agency that is the recipient of the request. FOIA 7(1)(4)(i)
  - B. Interfere with pending administrative enforcement proceedings conducted by any public body agency that is the recipient of the request. FOIA 7(1)(4)(j)
  - C. Deprive a person of a fair trial or an impartial hearing. FOIA 7(1)(4)(k)
  - D. Unwarrantably disclose the identity of a confidential source of confidential information furnished only by the confidential source, or persons who file complaints with or provide information to administrative, investigative law enforcement or penal agencies, except that the identities of witnesses in traffic accidents, traffic accident reports, and special reports shall be provided by agencies of local government, except that disclosure would interfere with an active criminal investigation conducted by the agency that is the recipient of the request. FOIA 7(1)(4)(l)
  - E. Disclose unique or specialized investigative techniques other than those generally used and known. FOIA 7(1)(4)(m)
  - F. Endanger the life or physical safety of law enforcement personnel or any other person. FOIA 7(1)(4)(n)
  - G. Obstruct an ongoing criminal investigation by the agency that is the recipient of the request. FOIA 7(1)(4)(o)
- 5. Communications between a public body and an attorney or auditor representing the public body that would not be subject to discovery in litigation, and materials prepared or compiled by or for a public body in anticipation of a criminal, civil or administrative proceeding upon the request of an attorney advising the public body, and materials prepared or compiled with respect to internal audits of public bodies. FOIA 7(1)(5)
- 6. Records calling for all records falling within a category shall be complied with unless compliance with the request would be unduly burdensome for the public body and there is no way to narrow the request, and burden on the public body outweighs the public interest in the information. FOIA Section 7(j)

7. Records of law enforcement officers concerning all crimes under the age of 17 years are not open to the public. 705 ILCS 435/5-905 (3)

**NOTICE: ANY PERSON DENIED ACCESS TO INSPECT OR COPY DEPARTMENT RECORDS MAY APPEAL THE DENIAL BY SENDING A WRITTEN NOTICE TO:**

**Public Access Counselor  
Illinois Attorney General's Office  
501 S. Second Street  
Springfield, IL 62705 217-558-0486**

**OR THEY MAY APPEAL THE DENIAL THROUGH JUDICIAL REVIEW UNDER SECTION 11 OF THE FOIACT.**

**FEES:**  
Fees are paid at the Village of Addison in the Finance Department. The Police Department does not accept payment.

- 1. Documents (not including Crash Reports) - Charges are applied per request, not per report.
  - No charge for less than 51 pages.
  - 15 cents for each page after 50 pages.
  - \$1.00 extra for certified reports.
- 2. Crash Reports - \$5.00 for each report
- 3. Accident Reconstruction Reports - \$20.00 for each report.
- 4. Photos - \$3.00 per print
- 5. CD (Audio) - \$10.00 each
- 6. DVD (Video) - \$25.00 each
- 7. There will be no fee for inspection of records.

**PLEASE NOTE:** When making a request via the Internet or Fax, the form containing your original signature must be presented at the time of release and for payment. You will need to present a valid form of identification.

**Attestation of the Nonexistence of Record:**  
I attest that after a thorough search of our files and records, carried out under my direction and control, no records matching the requested records were located. It is to be understood that this does not mean that the records do not exist under another spelling, another name or under another classification, but that with the information in your request furnished to our office and to the best of our knowledge, no such records exist in our files.

**Attestation of Destroyed Records:**  
I attest that a thorough search of our files and records, carried out under my direction and control, revealed the requested record does not exist. The Department regularly maintains records such as those requested. However, pursuant to the Illinois Local Records Act, 100 ILCS 200/7-10, the requested records no longer exist. In accordance to the Illinois Local Records Act and the Illinois Administrative Code, the requested records are retained for \_\_\_ years and are subsequently destroyed.

Tue, Jul 21, 2020 at 11:20 AM

Good afternoon, Ms. Stengle,

Thank you for your request for information pursuant to the Illinois Freedom of Information Act, 5 ILCS 140/1 et seq.

Your FOIA requesting "the number of all police calls for service" at four addresses on Pleasant Street in Woodstock, IL from 2014-2018 was granted and the responsive information follows:

874 Pleasant Street: 2014 = 1; 2015 = 1; 2016 = 0; 2017 = 3; 2018 = 0.

876 Pleasant Street: 2014 = 0; 2015 = 2; 2016 = 1; 2017 = 3; 2018 = 0.

894 Pleasant Street: 2014 = 1; 2015 = 0; 2016 = 1; 2017 = 0; 2018 = 0.

896 Pleasant Street: 2014 = 0; 2015 = 0; 2016 = 0; 2017 = 1; 2018 = 0.

As FOIA Officer for the City of Woodstock, I am the person responsible for this response.

Regards,

Jane Howie

Executive Assistant/FOIA Officer

City Manager's / Mayor's Office

City of Woodstock

RE: FOIA Request No. 20-2476

Dear Ms. Stengle:

Thank you for your request for information pursuant to the Illinois Freedom of Information Act, 5 ILCS 140/1 et seq. On July 15, 2020, you submitted the following request to the City of Aurora:

*We are seeking the number of all police calls for service to 469 N. Lake Street from 2014-2018, broken down by year.*

*in addition, we request the NFRIS data of fire and EMS calls at 468 N. Lake Street for the years 2014-2018. We also ask for the EMS data to be broken down into ALS and BLS calls. I prefer that the copies be provided by email.*

*I very much appreciate your attention to this matter. Please let me know when this data will be available. I would be grateful if the information could possibly be provided this afternoon.*

Thank you!

Please be advised that your request is granted and responsive documents will be released for your review. Note the following as well:

The CAD system was changed in 2018, therefore there are two documents from the police department, and they will look different.

Sincerely,

**Sarah E. Walsh**

## Request #20-2477

☑ CLOSED

As of July 22, 2020, 9:10am

Request Visibility: Unpublished

### Details

---

We are seeking the number of all police calls for service to 537 Hartford Avenue from 2014-2018, broken down by year.

In addition, we request the NFRIS data of fire and EMS calls at 537 Hartford Avenue for the years 2014-2018. We also ask for the EMS data to be broken down into ALS and BLS calls. I prefer that the copies be provided by email.

I very much appreciate your attention to this matter. Please let me know when this data will be available. I would be grateful if the information could possibly be provided this afternoon.

Thank you!

RE: FOIA Request No. 20-2477

Dear Ms. Stengle:

Thank you for your request for information pursuant to the Illinois Freedom of Information Act, 5 ILCS 140/1 et seq. On July 15, 2020, you submitted the following request to the City of Aurora:

*We are seeking the number of all police calls for service to 537 Hartford Avenue from 2014-2018, broken down by year.*

*In addition, we request the NFRIS data of fire and EMS calls at 537 Hartford Avenue for the years 2014-2018. We also ask for the EMS data to be broken down into ALS and BLS calls. I prefer that the copies be provided by email.*

*I very much appreciate your attention to this matter. Please let me know when this data will be available. I would be grateful if the information could possibly be provided this afternoon.*

*Thank you!*

Please be advised that your request is granted and responsive documents will be released for your review. Note the following as well:

There are no responsive records from the fire department.
